

PINGONE PROTECT POV

TRY IT FIRST: THE SMARTER APPROACH TO FRAUD PREVENTION

Fraud threats are evolving—your defences should too. ProofID's PingOne Protect Proof of Value (PoV) provides organisations with clear insights into potential fraudulent activity within their environment and the business impact of deploying PingOne Protect.

By trialling PingOne Protect in a listen/learning mode, we provide quantified fraud detection insights and actionable recommendations to enhance identity security while improving the user experience by reducing unnecessary authentication challenges.

WHY TRY THE PINGONE PROTECT POV?

▷ TRY BEFORE YOU BUY

Run a no-risk trial of PingOne Protect in passive mode—gain fraud and UX insights without disruption or commitment.

▷ PROACTIVELY PREVENT FRAUD

Detect and analyse potential threats like account takeover attacks, credential misuse and suspicious bot activity—all in real time.

▷ DATA-DRIVEN INSIGHT, ZERO RISK

Get a clear view of potential fraud risks and quantify their business impact—so you can make informed investment decisions with confidence.

▷ REDUCE FRICTION, NOT SECURITY

Understand where you can remove unnecessary authentication steps to improve user satisfaction without lowering security standards.

▷ GET A COSTED IMPLEMENTATION PLAN

Receive a clear, actionable roadmap for moving from trial to full deployment—tailored to your organisation's needs.

HOW THE POV WORKS

- ▶ **Implementation** – We deploy PingOne Protect in your environment in listen-only mode. Minimal changes to your user flows and no disruption to the end user experience.
- ▶ **Observation** – Over a 4-week period, PingOne Protect silently monitors activity, collecting insights on anomalies and risk events.
- ▶ **Data Assessment & Reporting** – We deliver a comprehensive fraud and security gap analysis, with actionable recommendations to improve defences and user experience.
- ▶ **Roadmap** – You'll receive a business impact summary and costed implementation proposal to inform your next steps.

SERVICE OUTCOMES

- ▶ **Detailed findings report** highlighting security gaps and fraud prevention insights.
- ▶ **Quantified business impact assessment** identifying fraud reduction opportunities.
- ▶ **Presentation of findings** to key stakeholders.
- ▶ **Costed proposal** for full PingOne Protect implementation.

WHY CHOOSE PROOFID?

ProofID is a Ping Identity Elite Delivery Partner with over a decade of experience in delivering identity security solutions. As a 6x Ping Identity Delivery Partner of the Year, ProofID has successfully deployed PingOne Protect and other Ping solutions across enterprises worldwide, ensuring seamless integration and maximum-security impact.
